Problem formulation

- Infrastructure issue such as road issue has become widespread. However, there is not much solutions to solve local infrastructure problem.

- Therefore, Team Pop would like to contribute to the local authority by proposing the web application.

Suggested approach

- Web application

  - Shows the current case status

  - Able to report new cases
  - Hold accessibility and readability

System design

- State diagram

- ## State diagram

System design

- ## State diagram

System design

- **Flow chart**

- Data development

- Frontend development

- Backend development

Simulation

Thank you
